**HEDIS***Cervical Cancer Screening - codes to Identify Cervical Cancer Screening*

<b>CPT</b>	<b>Procedure</b>
88141	Cytopathology, smears, cervical or vaginal (any reporting system); requiring interpretation by physician (List separately in addition to code for technical service) (Use in conjunction with codes 88142-88145, 88150-88154, 88164-88167)
88142	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid, automated thin layer preparation; manual screening under physician supervision
88143	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid, automated thin layer preparation; with manual screening and rescreening under physician supervision
88144	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid, automated thin layer preparation; with manual screening and computer-assisted rescreening under physician supervision
88145	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid, automated thin layer preparation; with manual screening and computer-assisted rescreening using cell selection and review under physician supervision
88147	Cytopathology, smears, cervical or vaginal by automated system under physician supervision
88148	Cytopathology, smears, cervical or vaginal screening by automated system with manual rescreening
88150	Cytopathology, smears, cervical or vaginal, up to three smears; screening by technician under physician supervision
88152	Cytopathology, smears, cervical or vaginal with manual screening and computer-assisted rescreening under physician supervision
88153	Cytopathology, smears, cervical or vaginal with manual screening and rescreening under physician supervision
88154	Cytopathology, smears, cervical or vaginal with manual screening and computer-assisted rescreening using cell selection and review under physician supervision
88155	Cytopathology, smears, cervical or vaginal, up to three smears; with definitive hormonal evaluation (eg, maturation index, karyopyknotic index, estrogenic index) (use in conjunction with 88142-88145, 88150-88154, 88164-88167)
88156	DELETED (use 88164) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), up to three smears; screening by technician under physician supervision
88157	DELETED (use 88141) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), up to three smears; requiring interpretation by physician
88158	DELETED (use 88166) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), up to three smears; with manual cytotechnologist screening and automated rescreening under physician supervision
88164	Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), manual screening under physician supervision

- 88165 Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)) with manual screening and rescreening under physician supervision
- 88166 Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)) with manual screening and computer-assisted rescreening under physician supervision
- 88167 Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)) with manual screening and computer-assisted rescreening using cell selection and review under physician supervision

**HEDIS**

*Chlamydia Screening in Women - codes to Identify Chlamydia Screening*

<b>CPT</b>	<b>Procedure</b>
87110	Culture, chlamydia
87270	Infectious agent antigen detection by DFA, Chlamydia trachomatis
87320	Infectious agent antigen detection by EIA, qualitative or semiquantitative, multistep method, Chlamydia trachomatis
87490	Chlamydia trachomatis, direct probe technique
87491	Chlamydia trachomatis, amplified probe technique
87810	Infectious agent detection by immunoassay with direct optical observation, Chlamydia trachomatis

**HEDIS**

*Chlamydia Screening in Women - codes to Identify Exclusions for Chlamydia Screening*

**CPT Procedure**

81025	Urine pregnancy test, by visual color comparison methods
84702	Gonadotropin, chorionic (hCG): quantitative
84703	Gonadotropin, chorionic (hCG): qualitative

**HEDIS**

*Chlamydia Screening in Women - codes to Identify Sexually Active Women*

<b>CPT</b>	<b>Procedure</b>
80055	Obstetrical panel - this panel must include the following - Hemogram, automated and manual differential WBC count (85022) or Hemogram and platelet count, automated, and automated complete differential WBC count (85025); Hepatitis B surface antigen (87340), Antibody, Rubella (86762), Syphilis test, qualitative (86592), Antibody screen, RBC (86850), Blood typing ABO (86900) and Blood typing Rh (86901)
81025	Urine pregnancy test, by visual color comparison methods
82105	Alpha-fetoprotein, serum
82106	Alpha-fetoprotein, amniotic fluid
82731	Fetal fibronectin, cervicovaginal secretions, semiquantitative
83516	Immunoassay for analyte other than infectious agent antibody or infectious agent antigen, quantitative or semiquantitative; multiple step method
83518	Immunoassay for analyte other than infectious agent antibody or infectious agent antigen, quantitative or semiquantitative; single step method (eg. reagent strip)
83520	Immunoassay, analyte, quantitative; not otherwise specified
84702	Gonadotropin, chorionic (hCG): quantitative
84703	Gonadotropin, chorionic (hCG): qualitative
86225	Deoxyribonucleic acid (DNA) antibody: native or double stranded
86226	Deoxyribonucleic acid (DNA) antibody: single stranded
86592	Syphilis test, qualitative (eg. VDRL, RPR, ART)
86593	Syphilis test, quantitative
86631	Antibody, Chlamydia
86632	Antibody, Chlamydia, IgM
87110	Culture, chlamydia
87164	Dark field examination, any source (eg. penile, vaginal, oral, skin); includes specimen collection
87166	Dark field examination, any source (eg. penile, vaginal, oral, skin); without collection

- 87270 Infectious agent antigen detection by DFA, Chlamydia trachomatis
- 87320 Infectious agent antigen detection by EIA, qualitative or semiquantitative, multistep method, Chlamydia trachomatis
- 87490 Chlamydia trachomatis, direct probe technique
- 87491 Chlamydia trachomatis, amplified probe technique
- 87810 Infectious agent detection by immunoassay with direct optical observation, Chlamydia trachomatis
- 88150 Cytopathology, smears, cervical or vaginal, up to three smears; screening by technician under physician supervision
- 88152 Cytopathology, smears, cervical or vaginal with manual screening and computer-assisted rescreening under physician supervision
- 88153 Cytopathology, smears, cervical or vaginal with manual screening and rescreening under physician supervision
- 88154 Cytopathology, smears, cervical or vaginal with manual screening and computer-assisted rescreening using cell selection and review under physician supervision
- 88155 Cytopathology, smears, cervical or vaginal, up to three smears; with definitive hormonal evaluation (eg, maturation index, karyopyknotic index, estrogenic index) (use in conjunction with 88142-88145, 88150-88154, 88164-88167)
- 88156 DELETED (use 88164) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), up to three smears; screening by technician under physician supervision
- 88157 DELETED (use 88141) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), up to three smears; requiring interpretation by physician
- 88158 DELETED (use 88166) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)), up to three smears; with manual cytotechnologist screening and automated rescreening under physician supervision
- 88160 Cytopathology, smears, any other source; screening and interpretation
- 88161 Cytopathology, smears, any other source; preparation, screening and interpretation
- 88162 Cytopathology, smears, any other source; extended study involving over 5 slides and/or multiple stains
- 88235 Tissue culture for non-neoplastic disorders; amniotic fluid or chorionic villus cells
- 88267 Chromosome analysis, amniotic fluid or chorionic villus, count 15 cells, 1 karyotype, with banding
- 88269 Chromosome analysis, amniotic fluid or chorionic villus, count cells 6-12 colonies, 1 karyotype, with banding

**HEDIS**

*Cholesterol Management after Acute Cardiovascular Events - codes to Identify LDL-C Screening*

<i>CPT</i>	<i>Procedure</i>
80061	Lipid panel - this panel must include the following - cholesterol (82465), lipoprotein, direct measurement, high density cholesterol (83718) & triglycerides (84478)
83715	Lipoprotein, blood; electrophoretic separation and quantitation
83716	Lipoprotein, blood: high resolution fractionation and quantitation of lipoprotein cholesterol (eg. electrophoresis, nuclear magnetic resonance, ultracentrifugation)
83721	Lipoprotein, direct measurement; direct measurement, LDL cholesterol

**HEDIS**

*Comprehensive Diabetes Care - code to Identify HbA1c Testing*

---

**CPT Procedure**

---

83036 Hemoglobin: glycated

**HEDIS**

*Comprehensive Diabetes Care - codes to Identify Diabetic Nephropathy*

<i>CPT</i>	<i>Procedure</i>
81000	Urinalysis, by dip stick or tablet reagent for bilirubin, glucose, hemoglobin, ketones, leukocytes, nitrite, pH, protein, specific gravity, urobilinogen, any number of these constituents; non-automated, with microscopy
81001	Urinalysis, by dip stick or tablet reagent for bilirubin, glucose, hemoglobin, ketones, leukocytes, nitrite, pH, protein, specific gravity, urobilinogen, any number of these constituents; automated, with microscopy
81002	Urinalysis, by dip stick or tablet reagent for bilirubin, glucose, hemoglobin, ketones, leukocytes, nitrite, pH, protein, specific gravity, urobilinogen, any number of these constituents; non-automated, without microscopy
81003	Urinalysis, by dip stick or tablet reagent for bilirubin, glucose, hemoglobin, ketones, leukocytes, nitrite, pH, protein, specific gravity, urobilinogen, any number of these constituents; automated, without microscopy
81005	Urinalysis; qualitative or semiquantitative, except immunoassays

**HEDIS**

*Comprehensive Diabetes Care - codes to Identify LDL-C Screening*

<i>CPT</i>	<i>Procedure</i>
80061	Lipid panel - this panel must include the following - cholesterol (82465), lipoprotein, direct measurement, high density cholesterol (83718) & triglycerides (84478)
83715	Lipoprotein, blood; electrophoretic separation and quantitation
83716	Lipoprotein, blood; high resolution fractionation and quantitation of lipoprotein cholesterol (eg. electrophoresis, nuclear magnetic resonance, ultracentrifugation)
83721	Lipoprotein, direct measurement; direct measurement, LDL cholesterol

**HEDIS**

*Comprehensive Diabetes Care - codes to Identify Microalbuminuria Tests*

<b>CPT</b>	<b>Procedure</b>
82042	Albumin; urine, quantitative
82043	Albumin; urine, microalbumin, quantitative
82044	Albumin; urine, microalbumin, semiquantitative (eg, reagent strip assay)

**HEDIS**

*Prenatal and Postpartum Care - Codes to Identify Postpartum Visits*

**CPT Procedure**

88141	Cytopathology, smears, cervical or vaginal (any reporting system); requiring interpretation by physician (List separately in addition to code for technical service) (Use in conjunction with codes 88142-88145, 88150-88154, 88164-88167)
88142	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid; automated thin layer preparation; manual screening under physician supervision
88143	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid; automated thin layer preparation; with manual screening and rescreening under physician supervision
88144	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid; automated thin layer preparation; with manual screening and computer-assisted rescreening under physician supervision
88145	Cytopathology, smears, cervical or vaginal (any reporting system); collected in preservative fluid; automated thin layer preparation; with manual screening and computer-assisted rescreening using cell selection and review under physician supervision
88147	Cytopathology, smears, cervical or vaginal by automated system under physician supervision
88148	Cytopathology, smears, cervical or vaginal screening by automated system with manual rescreening
88150	Cytopathology, smears, cervical or vaginal, up to three smears; screening by technician under physician supervision
88152	Cytopathology, smears, cervical or vaginal with manual screening and computer-assisted rescreening under physician supervision
88153	Cytopathology, smears, cervical or vaginal with manual screening and rescreening under physician supervision
88154	Cytopathology, smears, cervical or vaginal with manual screening and computer-assisted rescreening using cell selection and review under physician supervision
88155	Cytopathology, smears, cervical or vaginal, up to three smears; with definitive hormonal evaluation (eg, maturation index, karyopyknotic index, estrogenic index) (use in conjunction with 88142-88145, 88150-88154, 88164-88167)
88156	DELETED (use 88164) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)); up to three smears; screening by technician under physician supervision
88157	DELETED (use 88141) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)); up to three smears; requiring interpretation by physician
88158	DELETED (use 88166) - Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)); up to three smears; with manual cytotechnologist screening and automated rescreening under physician supervision
88164	Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)); manual screening under physician supervision

- 88165      Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)) with manual screening and rescreening under physician supervision
- 88166      Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)) with manual screening and computer-assisted rescreening under physician supervision
- 88167      Cytopathology, smears, cervical or vaginal, (the Bethesda System (TBS)) with manual screening and computer-assisted rescreening using cell selection and review under physician supervision

**HEDIS**

*Prenatal and Postpartum Care - Markers for Early Prenatal Care Obtainable from Administrative Data*

**CPT Procedure**

80055	Obstetrical panel - this panel must include the following - Hemogram, automated and manual differential WBC count (85022) or Hemogram and platelet count, automated, and automated complete differential WBC count (85025); Hepatitis B surface antigen (87340), Antibody, Rubella (86762), Syphilis test, qualitative (86592), Antibody screen, RBC (86850), Blood typing ABO (86900) and Blood typing Rh (86901)
80090	TORCH antibody panel - this panel must include the following - Antibody, cytomegalovirus (86644), Antibody, herpes simplex, non-specific type test (86694), Antibody, rubella (86762) and Antibody, toxoplasma (86777)
86762	Antibody, rubella
86900	Blood typing: ABO
86901	Blood typing: Rh
