

# LOINC Content Change Highlights

Swapna Abhyankar, MD  
Associate Director for Content Development  
September 27, 2017

**LOINC**<sup>®</sup>  
*from Regenstrief*

# Overview

- New terms
- Term edits
  - Deprecated & Undeprecated terms
- Other project updates and content work

# 1491 New LOINC terms for 2.61

- 772 lab
- 369 clinical
- 5 attachments
- 345 survey

# 772 new laboratory terms

- 500+ in the MICRO class
  - Includes 260 Streptococcus pneumoniae Danish serotype terms (more on this later)
  - Veterinary terms
- 70+ in the PATH class
  - CAP Colorectal cancer panel
  - CAP Breast cancer panel
- 45 in ABXBACT
  - Bacterial resistance gene terms
- Additional new terms in CHEM, DRUG/TOX, HEME, BLDBNK, etc.

# Laboratory term highlights

- CAP Colorectal and breast cancer panels

## 86635-0 Family planning report Document

### NAME

Fully-Specified Name:

Component	Property	Time	System	Scale	Method
Family planning report	Find	Pt	{Setting}	Doc	{Role}

### TERM DEFINITION/DESCRIPTION(S)

A family planning report contains demographic and social characteristics of individuals participating in a specific family planning program, such as the Title X National Family Planning Program administered by the U.S. Department of Health and Human Services, Office of Population Affairs (OPA). A family planning report may contain information on use of family planning and related preventive health services as well as staffing and revenue. Family planning data may be used to monitor site-specific performance and compliance with legal requirements and to guide future strategic and financial planning.

# Term edits for v2.61

- ~1200 updates to one of 6 major axes
  - Component
  - One of other major LOINC axes
- ~6000 updates to other fields such as long and short names, description, class, copyright

# Component edits

- 530 terms – even distribution across types
- Lab - mainly Strep pneumoniae terms
- Clinical - mainly to make the “lookback period” representation consistent
- Survey - mainly CMS

# Other major axis edits

- 650+ edits in 3 major categories
- ~45% radiology terms
- ~45% CMS terms
- ~10% pathology terms

# Other edits

- Descriptions, public change reason, class, copyright, etc.
- 5000 RAD name updates (moved modality to the beginning of the name) to align with RSNA naming model
- Name updates outside of RAD
  - Effort to shorten Long Common Names
    - FISH, DBS, removed “Bacterial” from Bacterial resistance gene term names
  - Removed parentheses around gene names (work in progress)

# Deprecated & Undeprecated terms

- 265 terms deprecated
  - Nearly all are Strep pneumo terms
- 12 California encephalitis virus terms undeprecated
  - Had been deprecated a few years ago because thought to be the same as La Crosse Virus
  - Upon further review, confirmed to be a distinct species in the CAL serogroup along with LaCrosse virus (LACV), Jamestown Canyon virus (JCV), Snowshoe Hare virus, and Trivittatus virus

# Streptococcus pneumoniae project

- Last fall, it was brought to our attention that Strep pneumo terms were ambiguous as to serotype designations
- Two serotype numbering systems – U.S. and Danish
- Serotype naming system (or the word “serotype”) not specified in Component
- Some information in term descriptions and related names, but not consistent

## Examples:

- **Ambiguous**
  - Streptococcus pneumoniae 9
    - Serogroup 9?
    - U.S. serotype 9/Danish serotype 9N?
  - Streptococcus pneumoniae 33
    - Serogroup 33?
    - U.S. serotype 33/Danish serotype 9A?
- **Unambiguous**
  - Streptococcus pneumoniae 51
    - Only possibility is U.S. serotype 51/Danish serotype 7F

Serogroup	Danish serotype	U.S. serotype
1	1	1
2	2	2
3	3	3
4	4	4
5	5	5
6	6A	6
	6B	26
	6C	6C
	6D	6D
	6Eb	NDc
	6F	6F
	6G	6G
	6H	6H
7	7F	51
	7A	7
	7B	48
	7C	50
8	8	8
9	9A	33
	9L	49
	9N	9
	9V	68
33	33F	70

# Streptococcus pneumoniae project (cont.)

- Reviewed all Streptococcus pneumoniae terms in LOINC
  - Determined which terms are ambiguous
  - Which ones are not ambiguous
- Updated unambiguous terms to reflect Danish serotype (~80)
- Deprecated ambiguous terms and mapped to a set of new terms that reflect Danish serotype (~230)

# Streptococcus pneumoniae project (cont.)

- Added Technical Brief regarding Strep pneumo naming in the LOINC Users' Guide
- Added part description
- Added U.S. serotype number as a related name
- Added vaccines to related names for relevant serotypes (“PCV7”, “PCV13”, “PPSV23”)
- Component: “Streptococcus pneumoniae Danish serotype {#}...”

# IEEE Collaboration update

- No updates since last release
- LOINC-IEEE mapping freely available with login on:
  - LOINC website as accessory file (<https://loinc.org/downloads/accessory-files/>)
  - NIST RTMMS site (<https://rtmms.nist.gov/rtmms/index.htm#!hrosetta>)
- Also can search in RELMA or <http://search.loinc.org> for:
  - `relatedcodes:IEEE*` or `relatedcodes:MDC_REL_HUMIDITY_MICROENV`
- Planning to work on remaining concepts in 11073-10101a before 2.62
- AMIA presentation in November
- Working closely with the HL7/IEEE workgroup on 10101b and 10101c content...will likely be balloted in 2017-2018, then added to LOINC

# RSNA Collaboration update

- As of 2.61...Completed mapping for all modalities in the RSNA Core Playbook other than RP (modality-agnostic radiology procedures)
- 9/2017...RSNA Core Playbook fully represented in LOINC!
- Most of LOINC radiology codes have been updated per the LOINC/RSNA unified model
- LoincRsnaRadiologyPlaybook file available as an independent download (<https://loinc.org/downloads/accessory-files/>)
  - Includes mappings between the LOINC radiology parts and RadLex codes for all LOINC radiology terms as well as the Core Playbook maps where relevant
- Can search for Core Playbook maps using “coreplaybook:true”

# CMS Assessment project update

- LCDS AND IRF-PAI completed and in version 2.61 release
  - 85654-2 Long-Term Care Hospital (LTCH) Continuity Assessment Record and Evaluation (CARE) Data Set (LCDS) - version 3.00 [CMS Assessment]
    - Admission
    - Planned discharge
    - Unplanned discharge
    - Expired
  - Inpatient Rehabilitation Facility – Patient Assessment Instrument (IRF-PAI) – version 1.4
- 9/2017
  - Outcome and Assessment Information set (OASIS) - pre-released
  - Minimum Data Set (MDS) – undergoing final review, will be pre-released in November

# Other content work

- Agreement with CAP to represent all of CAP cancer protocols in LOINC
- Beginning work with ICCR (International Collaboration on Cancer Reporting) on representing ICCR cancer protocols in LOINC
- Preliminary discussion with AJCC (American Joint Committee on Cancer)
- Work with NIDDK on terms related to chronic kidney disease
- Mapping answer strings to SNOMED CT
- Groups project
- Special topics workgroups
  - Spring 2017: System for genetic testing, Naming of PCR-based Methods, Gene targets for microorganism identification
  - Fall 2017: Cell marker terms, High-sensitivity troponin, Document ontology, Better names
